

Full Cycle Third-Party Risk Management

Powered by our integrated and automated platform, ZenGRC is the industry-leading solution for risk management, delivering a fast, easy and prescriptive alternative to spreadsheets.

Functionality That Sets Us Apart

- Centralized vendor documentation allows you to effortlessly collect, store, and track critical vendor documentation such as SOC reports, SIG questionnaires, and penetration tests.
- Streamline vendor risk management while significantly reducing manual workload.
- Efficient questionnaire management allows you to seamlessly distribute, track, and analyze both internal and external questionnaires.
- Gain comprehensive insights into contract deviations and control effectiveness through built-in or customizable questionnaires tailored to your unique business processes.

Core Capabilities:

- Unified, Comprehensive Solution
- Simple Pricing
- Framework Flexibility
- Effortless Evidence Collection
- Customizable and Scalable
- Seamless Integrations

“Being newer to leveraging a GRC tool, what attracted me most to ZenGRC was the functionality and manageability versus the others players in that space. Easy-button!”

-Global Director – IT Operations & Security
